

MANUTEC MOULD RELEASE CM 200

Product Code: MOU011 | **Revision:** 20260226

Oil based concrete mould release agent for reliable performance & high-quality finishes in precast & cast-in-situ applications.

Available Pack Sizes

Applications

An oil based mould release agent formulated for use with most types of formwork across a wide range of operating conditions. It utilises a specially selected release system to optimise both mould life and the surface finish of concrete components. Designed for reliable performance in precast and cast-in-situ applications, it is ideal for forming concrete fence posts, gravel boards, kick boards and T-beams, ensuring clean release and consistent, high-quality results.

Applications

Apply to clean, prepared moulds and formers using a swab, brush, or spray, ensuring a light, even coating over the entire surface. Avoid over-application, as excess oil can cause surface defects, pooling, or leave residue that negatively affects the finish of the casting. On new wooden moulds, two applications before first use are recommended to assist in extending mould life.

Benefits

- Can be used in various conditions.
- Optimum surface finish.
- Provides corrosion resistance to metal moulds.
- Suitable for a variety of different moulds.

Typical Test Data

Appearance		Clear/straw fluid
Density @ 15°C (kg/m ³)	ASTM D4052	0.85
Flash Point (°C)	ASTM D92	>130
Kinematic Viscosity @ 40°C (mm ² /s)	ASTM D445	22

The typical test data provided is taken from average values, there will be some variability in production and therefore do not constitute a specification.

Health, Safety & Recommendations

- A Safety Data Sheet is available for consultation at www.aztecoils.co.uk.
- Packaging should not be left exposed to elements and drums should be laid horizontally to prevent contamination.
- This product should not be stored at temperatures over 60°C, kept out of direct sunlight, protected from frost and fluctuations in temperature.
- When disposing of the product after use, please protect the environment and comply with local regulations.

In line with our policy of continued improvement, Aztec Oils reserve the right to change specifications and availability without prior notice. This product, used according to our recommendations and for its designed application, does not represent any particular risk. The information present in this technical data sheet is indicative of the product and is given in good faith, but should not form part of any specification.
